

Intro to Racing Check List

(MUST be completed by participant prior to program)

_____ Valid Driver's License or Racing License # _____ State/org. _____

_____ SNELL SA-2015 or newer helmets. Either open or closed face. IF convertible, then closed face helmet. Please note SA-2020 will be required October 1, 2026.

_____ TOW HOOKS installed, if available.

_____ Convertible vehicles must pass "broomstick test" with fixed rollbar: driver's helmet must be under a straight line from top of windshield to top of rollbar. Pop-up roll bars are not acceptable.

_____ Trunk and Interior of Automobile: Completely Empty. Spare tire removed or securely mounted. No loose items in cars. (spare change, radar detectors, cell phones, etc.) Data Systems or Video – Securely Mounted, tethered with metal cable if mounted externally.

_____ Wheel Play: No excessive wheel bearing play in any of the 4 wheels.

_____ Lug Nuts Torqued to appropriate settings.

_____ Tires: Pressures set to appropriate settings. Tires must be in good condition with a minimum of 3/32" tread depth. LRP reserves the right to decide if tires are appropriate for the conditions.

_____ Engine Compartment: Battery is securely fastened. Belts and hoses are in good condition.

_____ Fluids: Engine Oil, Engine Coolant, Power Steering Fluid checked and set to appropriate levels.

_____ Brake Fluid: Date of last fluid change _____. Brake pads inspected. No excessive brake pedal travel is detected. Please do a cool down lap and pit-in if soft pedal develops.

_____ Brake Lights: Fully Operational

Cont. to page 2

_____ DRIVERS in a fully caged vehicle, track prepped car, or racecar: must have a minimum of a 2-layer approved SFI or FIA driving suit, gloves and shoes per track mandates. A SFI or FIA head and neck restraint device is also recommended. Track prepped car mean any vehicle in which the cockpit has been altered or modified in any way so that any part of the chassis or any firewall has been exposed.

_____ Seat Belts: Seat belts must be in fully operational condition. No 4-point Harnesses allowed. All belts must be in excellent or as-new condition, and must not be frayed, visibly worn, or faded. Belts must not be older than the expiration date specified on the manufacturer's dated label. Belts with only a date of manufacture on certification must not exceed 5 years.

If you are unsure about any of the items on the checklist, we suggest consulting with your local service station or mechanic to verify.

I, (Please Print Full Name Clearly)

_____, agree that my vehicle is in good mechanical condition, and that this checklist has been completed truthfully and accurately . Lime Rock Park reserves the right to deny participation in the program, without a refund, if the driver and/or vehicle do not comply with the above criteria.

Signature _____ Date ____/____/____
